Comments: Muffler rail has been removed, but the manual activation knob is on the right side of the piano with a round cam on the inside of the cabinet. Soft pedal control knob on upper case left, and Mandolin control knob on upper case right. Oak veneered case painted white ;with "Griffin's, San Antonio" decal on the fallboard. Uses style "A" music rolls. Non-original Emerson motor, Model S60 SGA - 2958, 1725 RPM. Piano purchased recently from a family that had it stored in a building in Oil City, PA. The piano looks to be quite complete and original, with the exception of the white paint. The stack has been re-tubed and does play. Overall the piano is a little rough but restorable. The family who previously owned the piano had a family member that worked at a Story and Clark piano factory in Seneca PA, which is just outside of Oil City. The Story and Clark piano factory had an affiliation with QRS automation. The piano was used in a demonstration and then sold to the family member that worked at the factory. The piano had been stored for several years.

Brand	S/N	Model	Case Type	Case Finish	Stack No.	Year Mfd.
Cremona	12301	K Orchestral	Keyboard Coin Piano	-----	----	----
Instrumentation: Piano with mandolin attachment, violin pipes, flute pipes, piccolo pipes, tambourine, triangle, and castanets. Plays type M music roll.						
Cremona	12309	-----	-----	Oak	----	----
Instrumentation: Piano with mandolin attachment. Roll Mechanism: Worm gear driven roll drive shaft; friction wheel on vertical shaft; Standard spoolbox with cast iron sides & brass tracker bar. Art Glass: 3-panel hinged front. Clear beveled glass, with small center glass panel, and wide panels between center and side glass. Comments: Stack and pipe chest missing. This may have been a selector in a G size case. There's a photo of a tune selector in a Style A case in Bowers encyclopedia. This may have been a larger equivalent. Has an ink stamping of "SUPERIOR" inside of a diamond on the bottom of the plate. Piano has the top plate over the tuning pins. Unusual case design. Case is the same size as a G, but with small differences. Has doors in the bottom like a style K or J case. Above keyboard top panel side glass is in doors that open up. Has original hanging lamps with red and green glass.

Instrumentation: Piano with mandolin attachment, violin pipes, flute pipes, either xylophone or Unafon bells, snare drum, bass drum, tympani, cymbal, and triangle. Plays type M music roll.						
Cremona	12329	M3 Theatre Orchestra	Photoplayer	Oak	----	----
Instrumentation: Piano, mandolin, violin, flute, saxophone, and bass pipes, xylophone, snare drum, bass drum, tympani, cymbal, tambourine, triangle, and more.... Roll Mechanism: Duplex photoplayer spoolboxes. Plays type S 134-Note music roll. Comments: This M3, or maybe parts of it, were owned by Paul Eakins of Sikeston Missouri. He sold the dual 134 Roll spoolbox platform and 5 music rolls, and then separately sold the completely gutted case to Bob Nelson in Atoka, Oklahoma. The current owner later purchased the case, and also found the original spoolbox mechanism and reunited it with the otherwise gutted instrument. The piano section had the same case design as shown in the reprint catalog, and it had a two piece piano plate.						
Cremona	12356	2	Keyboard Coin Piano	Oak	----	----
Instrumentation: Piano with mandolin attachment. Roll Mechanism: Worm gear driven roll drive shaft; stepped pulley for tempo control; Standard spoolbox with cast iron sides & brass tracker bar. Plays type A music roll. Art Glass: Same as glass in Cremona advertisement for Style 2 piano. Comments: Gold two-piece piano plate. Restored by Tim Westman.						
Cremona	12362	2	Keyboard Coin Piano	Quartered Oak	9531	----
Instrumentation: Piano with mandolin attachment. Stack: #9531; Early stack (with tubing connections in back). Roll Mechanism: Worm gear driven roll drive shaft; stepped pulley for tempo control; Standard spoolbox with cast iron sides & brass tracker bar. Plays type A music roll. Coin Mechanism: Spring-loaded ratchet wheel. Art Glass: Same as glass in Cremona advertisement for Style 2 piano. One of the clear glass segments is cracked. Comments: Single pneumatic vacuum regulator. Tuner signature and date on plate of ?/?/21. One inch wide flat drive belt between motor and pump, with metal pump rods. No oil cups. Piano action fairly clean and in good condition. Current owner received the instrument in 2012 with some earlier but brittle re-tubing and stack pneumatics recovered. Vacuum regulator and reservoir recovered as well. Some splitting of back post behind the plate. Missing damper rail, but knob still on bass end of case exterior. Plays fairly well, but a complete re-restoration is needed.

Instrumentation: Piano with mandolin attachment.						
Stack: #None; Early stack (with tubing connections in back).						
Roll Mechanism: Worm gear driven roll drive shaft; stepped pulley for tempo control; Standard spoolbox with cast iron sides & brass tracker bar. Plays type A music roll.						
Coin Mechanism: Spring-loaded ratchet wheel.						
Art Glass: Three square panels of geometric colored and clear beveled glass art glass - no motifs and no known illustration in books						
Comments: Similar to Cremona Style 2 Internally, but different art glass. Single pneumatic vacuum regulator. Original Emerson motor, Model (Type) 7361 MS, S/N 598627. Handwritten S/N on back of case at bass end. Instrument was very complete except for upper spool flanges, coin drawer, and possibly an electrical junction box at the motor. Condition: strings and metal parts rusty, significant felt and case damage. Stored in very humid climate. Stack recovered at one time and probably re-tubed, but piano action was untouched. Use round or V-belt between pump and motor. Instrument has wooden pump rods, with oil cups on bearing blocks for pump crank. Case and piano action in very poor shape; all ribs were detached from sound board and sound board severely warped, cracked, and mostly detached. Severe splitting of back posts. Instrument reportedly to have come from Melrose Tavern in Chicago.						
Cremona	12542	K Orchestral	Keyboard Coin Piano	-----	---	----
Instrumentation: Piano with mandolin attachment, violin pipes, flute pipes, piccolo pipes, tambourine, triangle, and castanets.						
Plays type M music roll.						
Comments: Violin pipes are metal. No shutter above pinblock, as found in most examples of the style K. Stanton's Auction to Jasper Sanfilippo in 11/2014.						
Cremona	12574	M3 Theatre Orchestra	Photoplayer	Oak	---	----
Instrumentation: Piano, mandolin, violin, flute, saxophone, and bass pipes, xylophone, snare drum, bass drum, tympani, cymbal, tambourine, triangle, and more....						
Roll Mechanism: Duplex photoplayer spoolboxes. Plays type S 134-Note music roll.						
Comments: The one-piece plate piano design is more like the style O ( as shown in the reprint catalog) and the side chests grill design is also more like the style O and yet not quite the same. The wood trim around the lid of the side chest is decorative and the total width of the piano and side chests is 16' 3". J.B. Tate's Grand Opera House in Perry, Oklahoma, purchased the M3 new. It was stored on dirt in a barn after it was removed from service. The photoplayer was restored over a 25 year span, as the bottom 4" was rotted away on all three cases, and most of the valve chests and soft wood were eaten by termites. The only dates found: tuned by Cliff More 1922 & 1926. Treble valve chest rebuilt 11/29. The original roll configuration was double 134 S rolls. It was purchased from the Tate estate in the late 1970s.

Marquette	16426	Player piano	Upright home piano	Mahogany	2355	----
Instrumentation: 88-note piano.						
Stack: #2355; Late stack (with tubing connections in front).						
Roll Mechanism: Windmotor driven standard 88-note player piano spoolbox. Plays type 88-Note music roll.						
Comments: Standard 88-note upright player piano, with 88-note player mechanism. Fallboard decal: "Tryber - Marquette, Chicago, U.S.A." Cast into top of plate is "Tryber-Marquette, Chicago U.S.A." Ornate decal on piano hammer rail reads: "Made Expressly for Tryber Piano Co. Chicago U.S.A." Spoolbox feed powered by 5-lobe windmotor, with nickel plated brass 9-per-inch tracker bar. The Tryber association with Marquette would have likely occurred after the 1907 incorporation as "Tryber Piano Co.," and before bankruptcy in April of 1916.

Roll Mechanism: Belt from crankshaft to roll drive shaft; larger stepped pulley in front; Standard spoolbox with cast iron sides & brass tracker bar. Plays type A music roll.						
Coin Mechanism: Spring-loaded ratchet wheel.						
Comments: The Coin Accumulator does not match any commonly used by Cremona. It may have been an early unreliable type that was replaced by a coin magazine from a different brand of coin piano. The piano was well restored about 1970 by Arnie Neuhaus.						
Cremona	121453	A Art Piano	Keyboard Coin Piano	Quartered Oak	----	Est. 1912
Instrumentation: Piano with mandolin attachment.						
Plays type A music roll.						
Art Glass: Steam train going over a stone arch bridge.						
Comments: The piano plate has a date of 1-27-12. About the year 2000, the piano was observed as being complete but it had been very wet with most of the veneer loose. The owner wanted an outrageous sum of money for it.

Cremona	187364	-----	-----	-----	----	----
Comments: Interior player mechanisms were removed by my father after WWII and sold. Originally it was in a dance pavilion over water in Lake Chelan, Washington, owned by my great uncle Joseph Carpenter. That was in the late teens or early 1920's. The piano has remained in the family and I acquired it from an aunt. It is currently in SE Alaska and can be shipped to Seattle to be sold. No one in our family plays piano and I have decided to let it go rather than store it. It has been tuned, sounds really good and is in very good condition.
