## Wurlitzer 10,000 Series Disposition Ledger Database Report

Grouped by Year and Style - Sorted by Date and Serial Number

Total items listed in this report: 6472

- Style Notes:
1. The existing 1905-1911 ledger information begins on page 7, with the first item dated November 16, 1905, and ends on page 300.
  2. An asterisk (\*) after a serial number flags the item as being a first instance or occurrence within the ledger/database.
  3. Column "M" shows the Style Category Markings placed in the appropriate ledger column. Normally it is a simple, nearly vertical line ("|"), but these marks sometimes vary to indicate special attributes for an entry, such as "|+", "|v" or "|xv."
  4. The state designation for destination cities is often omitted, especially after ledger page 100. However, whenever the missing state designation for a city is obvious, and/or if it has been defined elsewhere in the ledger, the most likely state designation, if any, is automatically appended but within enclosing [brackets].
  5. The original ledger material has been slightly edited and obvious spelling and location errors corrected, but in all instances the original intent has been preserved. Otherwise the reader would be confronted with an endless number or annoying (sic) notations.

Comments: This one of four or five MQs that Mr. Schenkenberg owned – together with several Pianinos and a Tonophone or two – in a warehouse in Milwaukee. One day a reckless driver ran into an old warehouse building, breaking the wall open, whereupon John Ragan saw the coin pianos through the hole in the wall on his way to work. The Ragans purchased the group, which included most of the extant Mandolin Quartettes, and later sold three of them to Haning and White.
